

CAP COOLER

The "Cap Cooler" machine is a unit especially designed for cooling the caps before they are discharged into the collecting box.

The extremely effective cooling action grants the caps a temperature only 3° C higher than the ambient temperature.

Cap Cooler produces a uniform cooling of the complete cap, thus granting regular shrinkage and constant quality of the products. Ovalisation and deformation are therefore really reduced to minimum.

MAIN CHARACTERISTICS

- Easy to install
- Little floor space required (0.95 m²)
- Low energy consumption
- Suitable for different cap sizes
- Easy to adjust to different outputs
- All parts in contact with the caps in stainless steel

**Special version for extremely critical ambient conditions:
temperature higher than 38°C**

CAP COOLER

TECHNICAL DATA

Fan power	3 kW
Gearmotor power	0,09 kW
Noise level	< 78 dBA
Total dimensions	757 x 1709 x 1803 (H) mm
Foot print	757 x 1257 mm
Colour	White RAL 9010
Net weight	223 kg
Voltage	380 - 415V/3/50 Hz - 380 - 460V/3/60 Hz

PATENTED
